PROFESSIONAL SUMMARY

Detail-oriented Software Engineer and IT Monitoring Specialist with extensive experience in full-stack web development, infrastructure supervision, and incident management. Proven track record in designing scalable web applications (Next.js, Supabase, PHP/MySQL) and maintaining high system availability using proactive monitoring tools like Zabbix and Grafana. Passionate about software architecture, automated processes, and technical performance optimization.

WORK EXPERIENCES

Infrastructure Monitoring Intern

InTouch | June 2026 – December 2026

- Proactively monitored critical systems, networks, and applications to ensure continuous service availability.
- Analyzed system alerts, managed IT incident workflows, and escalated complex issues to specialized technical teams.
- Produced regular performance reports and tracked Quality of Service (QoS) metrics.
- Tech Stack & Keywords: Monitoring, IT Supervision, Incident Management, TCP/IP Networks, Linux, Log Analysis, Zabbix, Grafana, Reporting.

Software Development Intern

Techno Futur Group | January 2025 – July 2025

- Designed and developed web applications and software solutions (WordPress integration, custom PHP/MySQL modules).
- Led IT initiation and office software training sessions for students and professionals.
- Supported digital marketing campaigns and graphic design initiatives.

Freelance IT Specialist & Full-Stack Developer

Self-Employed | January 2025 – Present

- Delivered customized training in programming, operating systems, and office productivity tools.
- Designed digital brand assets and web solutions including professional CVs, logos, flyers, showcase websites, and automated Excel spreadsheets.

EDUCATION

Scientific Baccalaureate (S2)
Lycée Didier Marie, Saint-Louis
2020 – 2021

Professional Bachelor's Degree in Software Engineering (Licence)
Professional Bachelor's Degree in Software Engineering (Licence) 2021 - 2024

CERTIFICATIONS & COURSES

- **Customer Relationship Management Certificate** (CRM) – Business Communication Center (2025)

PROJECTS

Dakar Mobility
Built an urban mobility application with real-time tracking and geolocation using Next.js, Supabase, and Mapbox.

SAMA CV
Developed a web platform dedicated to creating and optimizing ATS-compliant professional CVs.

NDAR'GO
Designed a transport and delivery platform featuring package tracking and automated booking modules (WordPress, PHP, MySQL).

Professional Interactive Portfolio
Engineered a modern web portfolio showcasing software engineering projects and technical skills (Next.js, Vercel).
